# the STORY

though, and spoiled the serenity of the woods. The quiet, woodlands community has now been turned upside-down by these horrifying events. Wario has now named the woods after himself, and peaceful creatures are not welcome.

Toad, the Mushroom Kingdom hero, has decided to travel to Wario's

Woods and put an end to Wario's evil reign of terror. Toad knows that, with the sprites help, he will be able to rid the forest of Mario's twisted nemesis. Thankfully, the sprites are able to create bombs. It's Toad's job to line up the bombs with the enemies of the woods, thus defeating those evil creatures. By clearing more and more of the woods, Toad steps ever closer to the ultimate challenge of facing Wario.

**T**he Peaceful Woods was once the friendly home of sprites and other gentle forest creatures. Wario and his band of monsters invaded,

## Basic game play

Toad's goal is to rid the woods of monsters. Catherine and the Sprite assist Toad by tossing bombs into the playing field. Toad can move the pieces that drop into the field once they stop falling. Once the Bomb Time ends, Wario will appear, and his Black Bat will throw monsters along with bombs into the playing field. Wario will shake the trees and make the ceiling of the playing field sink. When Monster Time ends, Catherine and the Sprite will reappear.

**Bomb Time:** The Sprite drops bombs and the ceiling stays up

**Monster Time:** The Black Bat drops monsters and bombs. Wario makes the ceiling sink.

Monsters are cleared by arranging three or more monsters and bombs of the same color in a vertical, horizontal or diagonal line. The bomb(s) in the line will explode and take the monsters with them. When all of the monsters on the screen are gone, the round will be completed and you will move on to the next screen.

If the whole screen gets filled with monsters and bombs, the game will be over!

Wario's Woods automatically saves your progress periodically. To be sure that your saved information is not deleted, turn the power switch OFF only when you are at the title screen (pictured on page two). During game play, you can access the Game Select screen by pressing START and SELECT simultaneously. Once at the Game Select screen, press B to return to the title screen.

# Controller Information

There are two different controller set ups that can be used in Wario's Woods. When you start the game, you will automatically use the A type set up. If you would like to choose either the A or B type controller set up, you can make your choice in the Options screen under Button Select.

## CONTROLS FOR BOTH A AND B TYPE SET UP:

**START:** Go to game select screen/bypass screen text/pause game play

**START + SELECT:** Press simultaneously during game play to return to the game select screen

\*\* This is a quick way to stop playing and select a different game mode \*\*

**A button:** Select highlighted choice on the game select screen

**B button:** Cancel choice on game select/game information screens

**L button:** Kick monster or bomb to the left (only one monster or bomb)

**R button:** Kick monster or bomb to the right (only one monster or bomb)

**CONTROL PAD:** Move to highlight choices on Game Select, Options screens

## Game Modes

- Wario's Woods features two modes in which you can face an opponent. The first mode is one player versus a computer player (VS COM). The other mode is a two player game (VS 2P). There are some strategies that apply to both the VS COM mode and the VS 2P mode.
- In both games, you can win by either clearing your screen of monsters first, or by filling your opponent's screen with monsters and bombs. There are attacks that each player can utilize to help them defeat their opponent.
- The VS modes feature a best three out of five match to determine the winner.

## VS COM

In the VS COM mode, you will face a series of computer opponents. Progress toward your climactic struggle with Wario as you dispatch his henchmen along the way. You may choose from three difficulty settings at the beginning of your battle. Can you go all the way to Wario?

Here are a few of Wario's minions that you must face on your way to confronting Wario himself.

Sam Spook

Aqualea

Mangylox

## VS 2P

Playing the two player mode gives you a chance to test your skills against someone you know. After you select the VS 2P mode with the A button, use the control pad and the A button on controller one to select a data file where the matches will be recorded. Once a data file has been selected, use the control pad and the A button on controller one to select the type of monsters appearing in the playing field. How fast the bombs fall and how high the monsters fill the playing field at the beginning of each match are then selected by each player by using the control pad and the A button.

## VS Mode Attacks

Use the following attacks to help you defeat your opponent. Use the attacks to clear your screen as quickly as possible or fill up your opponent's screen.

### CHAIN REACTION ATTACK

Create Chain Reactions to help you in your battle with your opponent. A Chain Reaction occurs when a match of bombs and monsters directly results in further matches as pieces fall into place. The attack outcome would be one of the following:

Your Bomb Time is increased

A stack of monsters appear on your opponent's playing field

The ceiling in your playing field rises by one row per reaction, plus one.

### CEILING ATTACK

If you make a match of four or more pieces, your opponent's ceiling will sink. The more pieces in the match the farther your opponent's ceiling will sink.

### DIAMOND ATTACK

A diamond will appear if you make a match of five or more monsters and bombs. If you make a match with the diamond, all of the bombs in your opponent's field will become monsters.

### EGG ATTACK

If, by placing a single bomb or monster, two matches explode simultaneously, an egg will fall into your opponent's field. The egg will hatch and more monsters will fall onto your opponent's field.

If an egg is on your field, you can stop the extra monsters from falling onto your field by breaking the egg before it hatches. To break the egg, pick it up and put it down again.

## Round game

The Round game is a chance for you to see how far you can go into Wario's Woods. In the Round game, you must simply clear the screen of all monsters to progress to the next level. Your progress will automatically be saved every five levels.

You can also earn coins by clearing a screen as quickly as possible. If you collect 50 coins, you will be awarded a Continue. A Continue will allow you another chance at beating the level where you lost.

## Time Race

In the Time Race, your challenge is to complete five sets of screens in the quickest time possible. You can establish times in Easy, Normal or Hard mode.

To establish an overall time in each mode, you must first complete four separate rounds, with a time record being set in each round. For example, if you select the Easy mode, you must play through four rounds, the first being a two screen race, the second being a three screen race—the third being a four screen race and the fourth being a five screen race. A time record will be kept when you complete each round. The times you set in each round are totaled to give you an overall time. Check your overall time to see if you can finish in bronze, silver or even gold medal time.

You can replay any round in order to improve your overall time mark. Try each different level to see which one gives you the greatest challenge.

## Lesson

The Lesson mode gives players a chance to actively learn how to make matches using the A, B, X and Y buttons. There are also demonstrations of advanced techniques such as how to make a Diamond, how to form chain reactions, and other miscellaneous ways to make matches.

On the main screen in the Lesson mode, select the demonstration by using the control pad and the A button. There are explanations of all techniques, as well as chances for the player to complete matches using each technique. Use the A button to select and the B button to cancel in the Lesson mode.

## Options Screen

In the Options menu, the player can enter a name for one player and Vs. battles, view record times from the Time Race, choose either the A or B type controller set up, erase saved data, or change from stereo to mono sound and vice versa. As with the main menu, use the A button to register a choice and the B button to cancel.

In the Name menu, you will find four data files where two-player action can be saved. For single player action, a name can be entered by choosing the 1P Mode.

The controller set up can be selected in the Button Select screen. Player 1 and 2 have a choice between the A and B type controller set up.

You can erase saved data in the Data Clear screen. You can choose to delete information from the 2P Vs mode, Round Game or the Time Race.

## Wario's MONSTERS

Wario has a number of different monsters for followers. You can defeat each type of monster by meeting the following conditions:

Fuzz, Spud, and Squeak—Arrange two or more like monsters in a vertical, horizontal or diagonal line with at least one bomb.

Beaker and Scram—Arrange two or more like monsters diagonally with at least one bomb.

Spook—Arrange a match, and this monster will begin to flash. Arrange another match while the Spooks are flashing to make them disappear.

Dovo—Arrange one match, and the color of this character will change. Arrange a second match with the new color to make the monsters disappear.

## Making Matches

### Picking up/Placing/Kicking monsters and bombs

The following information is explained as though the player is using the A type controller set up. The B type set up changes the buttons used to perform the following maneuvers.

### Picking up stacks of monsters and bombs

Press the A button to pick up a stack of monsters or bombs

Press the A button to place a stack in front of Toad. Toad cannot place a stack onto another stack of three or more pieces, unless he is jumping down from another stack.

If you press the A button while climbing, you can pick up the piece that is the closest to Toad, as well as all the pieces above it.

## Picking up and placing single monsters and bombs

Press the B button to pick up a single monster or bomb, even if it's in a stack.

Press the B button to place a single piece in front of Toad. If Toad is carrying a stack, press the B button to place only the piece that is just above Toad's head.

If you press the B button while climbing, Toad will pull the closest monster or bomb out of the stack.

## Kicking

Press the Y button to kick. Toad can kick only a single bomb or monster. Even if Toad is carrying pieces, he can still kick other pieces.

You may press **↓** and A or B to kick, or you may use the L and R buttons as well.

## Examples of successful matches

1. Toad drops a Spud by pressing the A button and makes a match with a bomb and another Spud of the same color.

2. A match is made as Toad drops a bomb by pressing the A button.

3. By walking to the right while holding a monster, Toad makes a match with a bomb and another monster.

4. Jumping down to the right results in another match.

5. Toad makes a match by pressing A to place a Fuzz and a bomb on top of another Fuzz.

6. Toad moves to the right while holding a stack of monsters and waits under a bomb as it drops.

## Successful matches continued

- 7. By pressing the B button, Toad is able to pick up a bomb and make a match.

- 8. By pressing the B button, Toad picks up a monster which results in a bomb dropping and a match being completed.

- 9. Toad picks up a Spook using the B button to make a Beaker drop into a diagonal match.

- 10. Toad picks up a Squeak to the right, which results in a diagonal match with a bomb and another Squeak.

- 11. Toad kicks a Spud to send it sliding to the right. When the Spud drops, it forms a match with a bomb and another Spud.

- 12. By kicking a Fuzz, Toad makes a match with a bomb and another Fuzz.

## Tactics

There are some special tactics that you can employ to help you in your battle against Wario. Use of these tricks will maximize your effectiveness in all areas of Wario's Woods.

### CHAIN REACTIONS

When one match of bombs and monsters leads directly to another match as pieces fall into place, the resulting Chain Reaction will cause Bomb Time to increase and Monster Time to decrease. The ceiling will also rise one row per match, plus one.

### DIAMONDS

When you make a match of five or more monsters and bombs, a diamond will appear. If you make a match with the diamond, all monsters the same color as the diamond will be destroyed. Diamonds appear in random colors.

### RAISING THE ROOF

Wario pushes the ceiling down when he appears. The following four techniques can be used to raise the ceiling on the playing field.

- MAKE A DIAGONAL MATCH OF THREE PIECES → THE CEILING GOES UP ONE ROW
- MAKE A MATCH OF FOUR PIECES → THE CEILING GOES UP TWO ROWS
- MAKE A MATCH OF FIVE PIECES → THE CEILING GOES UP THREE ROWS
- MAKE A MATCH OF SIX PIECES → THE CEILING GOES UP FOUR ROWS
